(j) Religious attendance

Figure 9: A comparison of the entropy of LM response distributions: text-davinci-003 tends to assign most of it's probability mass to a single option. This is in contrast to human opinions which tend to have a fair amount of variability.

Figure 10: Refusal rates across OpinionQA for different LMs and Pew survey respondents.

B.2 Steerability

In Appendix Figure 11, we compare how successful different LMs are at personalizing the the opinions of a given subgroup.

Figure 11: A break down of the post-steering representativeness scores of different LMs by the subgroup they are steered to.
